PROFESSIONAL SUMMARY

AI/ML and Full-Stack Developer with experience building scalable AI-powered applications, automation systems, and intelligent workflow solutions. Skilled in Retrieval-Augmented Generation (RAG), LLM integrations, AI orchestration, automation engineering, and full-stack web development using Python, TypeScript, React, Next.js, and PostgreSQL. Experienced in developing production-grade AI products, ETL workflows, Selenium-based automation systems, and responsive user-focused platforms. Strong understanding of automation reliability, API integrations, backend systems, and scalable application architecture with a problem-solving mindset focused on performance, maintainability, and user experience.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, Shell Scripting, HTML, CSS

Libraries: React.js, Next.js, Node.js, Flask, LangChain, LangGraph, scikit-learn, Pandas, NumPy, Tailwind CSS

Backend: Flask, Express.js, PostgreSQL, Supabase, pgvector, REST APIs, FastAPI, Docker, Vector Databases

Tools: GitHub, Microsoft Visual Studio 2022, Vercel, Langfuse, OpenRouter, Gemini API, , Unix/Linux, APIs, SSIS

Skills: Retrieval Augmented Generation (RAG), Prompt Engineering, ETL Pipelines, Selenium Automation, Machine Learning

Core Subjects: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering

PROFESSIONAL EXPERIENCE

Infosys Limited

Data Engineer

Hyderabad

Nov 2025 - Present

- Designed and optimized scalable automation and ETL workflows using Microsoft Visual Studio 2022, SSIS, SQL, Python, Shell Scripting, and Unix to improve data processing reliability, reporting efficiency, and operational performance across enterprise systems.
- Developed Selenium-based automation solutions and Python scripting utilities for web workflow testing, data extraction, validation, and process automation, reducing manual effort and improving execution consistency.
- Built and maintained automation pipelines focused on reliability, maintainability, and faster execution feedback, leveraging strong problem-solving skills, DSA concepts, and scripting-based optimization techniques.
- Collaborated on backend workflow automation, data validation, and reporting systems while improving system scalability, reducing operational bottlenecks, and ensuring stable execution across development and testing environments.
- Applied automation engineering and quality-focused development practices to streamline repetitive workflows, improve process accuracy, and accelerate delivery of high-impact internal tools and reporting solutions.

National Informatics Centre (NIC)

Full Stack Intern

Delhi

May 2024 - July 2024

- Designed and developed a full-stack server management web application with a responsive frontend using HTML, CSS, and JavaScript, enabling efficient monitoring and management of server-related data through an intuitive dashboard interface.
- Built backend services using Python Flask and integrated PostgreSQL for secure database management, real-time data handling, and seamless communication between frontend and backend systems.
- Engineered complete frontend-backend integration for dynamic data flow, real-time server updates, and reliable CRUD operations while ensuring scalability, performance, and secure database connectivity.
- Optimized application workflow and data management processes to improve system reliability, user experience, and operational efficiency across the platform.

EDUCATION

Dehradun Institute of Technology (DIT) , DIT University
Bachelor of Technology - Computer Science and Engineering (AI/ML)

Dehradun, Uttarakhand
AUG 2021 - MAY 2025

PERSONAL PROJECTS

FitnessFuel - AI Powered Fitness and Nutrition Platform - [Live](#)

Built a full-stack AI-powered fitness and nutrition platform delivering personalized diet and workout plans based on user goals, biometrics, and activity levels. Implemented intelligent recommendation logic using Python, Flask, and K-Means clustering for nutritional analysis and adaptive workout generation. Integrated FatSecret API for real-time recipe search and developed a responsive React + TypeScript dashboard with Supabase authentication and progress tracking.

Tech: Python, Flask, scikit-learn, React.js, TypeScript, Node.js, Supabase, Tailwind CSS, Framer Motion, FatSecret API, Vercel.

PrepBud - AI Study Companion - [Live](#)

Developed a full-stack AI-powered study platform for medical and multi-domain students using Next.js 19 and Supabase. Engineered a custom multi-provider AI routing system with fallback handling, quota tracking, and streaming AI responses across Gemini and OpenRouter models. Implemented RAG pipelines, AI quiz generation, spaced repetition scheduling, study planners, and analytics with production-grade observability and state management.

Tech: Next.js 19, TypeScript, Supabase, PostgreSQL, pgvector, Gemini API, OpenRouter, Langfuse, Zustand, TanStack Query, RAG, Tailwind CSS, Vercel.

Portfolio Website - [Live](#)

Designed and developed a responsive personal portfolio website showcasing AI/ML projects, technical skills, and experience with a clean product-focused UI/UX. Implemented smooth animations, optimized rendering performance, and structured project presentation for effective technical communication across devices.

Tech: React.js, Vite, Tailwind CSS, Framer Motion, JavaScript, Vercel.

CERTIFICATIONS

Additional Certifications

- Infosys Certified DevOps Professional
- Infosys Certified Hadoop Data Platform Administrator
- Infosys Foundation Program

DECLARATION

I hereby declare that all the information provided above is true to the best of my knowledge and belief.
